

ESTA NEWSLETTER

REF: SLD: 08/91

The union has met with HR and Management to discuss a number of issues that have been raised by staff at VPC, including issues that have been long standing issues between ourselves and ESTA.

The AIR CONDITIONING saga continues! If cold air blasts directly on to staff, management say you have two choices:

- 1) Move or
- 2) Ask for the air flow to be re-directed – which will be done by Coombs in normal business hours.

We need to hear from members about the severity of the problem to assist us in escalating the problem.

BROKEN CHAIRS will remain where they are currently located because there is nowhere else to place them. Tenders for NEW CHAIRS have been issued. Management claims they expect that chairs will be replaced before the end of the year.

FONT SIZE is currently being voted on by the three centres. Hopefully the change will suit everybody's needs. Let us know if it is otherwise.

BROKEN TOILET in “mens” toilet is finally fixed!

CLEANING ISSUES

The cleaning contractors have been spoken to with regards to some substandard cleaning. The toilets are cleaned twice in 24 hours.

The building maintenance company “Coombs” will be contacted to clean the vents.

LEADERSHIP

Management claim they are reviewing processes and criteria for selecting acting or permanent team leaders and assistant team leaders.

There are some leadership courses that are being run to train those “new to the job” leaders.

CEPU is following up on the question of the “advertising” or otherwise for team leader and assistant team leader selections.

Please consider any new issues for the new EBA which is expiring July 09.

There are a number of individual member issues that we are currently representing. We will keep those members informed.
